## Scores Court For Leniency In Glass Trust Case

Report That Factories Will Be Closed Unless Blowers Accept 30 Per Cent Wage Reduction Leads To Statement Showing Enormous Profits Earned By Imperial Concern During Brief Career---Explains Why Light Fines Were Imposed

Washington, Nov. 17. - When his attention was called to a Pittsburg dispatch to the effect that as a result of fines recently imposed upon the Imperial Glass company of that city and its officers and directors by the United States court at Pittsburg, every factory in Fayette county would suspend operations, throwing between 700 and 800 men out of employment unless they should decide to accept a 30 per cent reduction in wages, Attorney General Wickersham became very indignant. He issued a statement reviewing the case as it was presented in court. This statement makes it apparent that the attorney general was very much disappointed in the leniency of the court in imposing fines instead of jail sentences on the officers of the

Fruit From World's Largest Apple Tree of Good Flavor

There are many states that claim to have the largest apple tree in the world, but Washington, according to many experts, is entitled to the honor. The annual apple show held in Spokane brought forth exhibitors from nearly every state in the Union. More than 2,000,000 apples were on exhibition, and prizes amounting to \$20,000 were awarded. Various states put forth claims to having the largest apple tree, and the stories of the number of barrels secured from the trees sounded like the tales told by enthusiastic fishermen. The judges decided that Washington really had the largest tree
